### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: The specifics being a liquid crystal display device characterized by a twist angle, cell thickness, and birefringence according to the specifications of the first embodiment and having the transmission characteristic of Figures 5 and 6.

Species II: The specifics being a liquid crystal display device characterized by a twist angle, cell thickness, and birefringence according to the specifications of the second embodiment and having the transmission characteristic of Figures 7 and 8.

Species III: The specifics being a liquid crystal display device characterized by a twist angle, cell thickness, and birefringence according to the specifications of the third embodiment and having the transmission characteristic of Figures 9 and 10.

Species IV: The specifics being a liquid crystal display device characterized by a twist angle, cell thickness, and birefringence according to the specifications of the fourth embodiment and having the transmission characteristic of Figures 11 and 12.

Art Unit: 2871

Species V: The specifics being a liquid crystal display device characterized by a twist angle, cell thickness, and birefringence according to the specifications of the fifth embodiment and having the transmission characteristic of Figures 13 and 14.

Species VI: The specifics being a liquid crystal display device characterized by a twist angle, cell thickness, and birefringence according to the specifications of the sixth and seventh embodiments and having the transmission characteristic of Figures 15-18.

Species VII: The specifics being a liquid crystal display device characterized by a twist angle, cell thickness, and birefringence according to the specifications of the eighth embodiment and having the transmission characteristic of Figures 19 and 20.

Species VIII: The specifics being a liquid crystal display device characterized by a twist angle, cell thickness, and birefringence according to the specifications of the ninth embodiment and having the transmission characteristic of Figures 21 and 22.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 2871

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
